

Session 4

- 1. Pick any one app you use daily (like Zomato, Instagram, or Paytm) and list 6 specific testing activities you would perform before its latest feature release. For each activity, write 1 line describing what it checks.**

1. Testing Activities Before a New Feature Release

App Selected: Instagram

Feature: New Story Poll Feature

Before releasing the feature, I would perform the following testing activities:

No.	Testing Activity	What It Checks
1	Functional Testing	Checks whether users can create, submit, and vote in a Story Poll correctly.
2	UI Testing	Checks whether the poll buttons, text, colors, and layout are displayed properly on different screen sizes.
3	Compatibility Testing	Checks whether the feature works correctly on different Android and iOS devices and operating systems.
4	Performance Testing	Checks whether polls load quickly and respond properly without slowing down the app.
5	Usability Testing	Checks whether users can easily understand and use the Story Poll feature.
6	Regression Testing	Checks whether the new feature has affected existing features such as Stories, likes, comments, and messaging.

2. reate a responsibility matrix (RACI chart) for a test team working on a new Flipkart-style shopping cart feature. Include at least 4 roles: Tester, Test Leader, Developer, and Product Owner. Assign who is Responsible, Accountable, Consulted, and Informed for each of these activities: Test Planning, Test Case Design, Test Execution, Bug Reporting.

2. RACI Responsibility Matrix

Project: New Flipkart-Style Shopping Cart Feature

Meaning of RACI

- **R – Responsible:** Person who performs the activity.
- **A – Accountable:** Person who takes final ownership and approves the work.
- **C – Consulted:** Person who provides advice or technical input.
- **I – Informed:** Person who needs to be updated about the progress or result.

RACI Chart

Activity	Tester	Test Leader	Developer	Product Owner
Test Planning	C	R / A	C	I
Test Case Design	R	A	C	C
Test Execution	R	A	C	I
Bug Reporting	R	A	C	I

Note: In this chart, the Test Leader is accountable for the overall testing work, while the Tester performs most of the testing activities. The Developer helps with technical information and bug fixes, and the Product Owner provides business requirements and receives updates.

3 . Write a brief job description (3-4 lines) for the role of a Test Leader in a team testing a new BookMyShow movie booking feature. Focus on daily responsibilities and decision-making areas.

3. Job Description – Test Leader

Role: Test Leader

Project: BookMyShow Movie Booking Feature

Test Leader Job Description

A Test Leader manages and coordinates the testing activities for the new movie booking feature. They prepare the test plan, assign tasks to testers, and monitor daily testing progress. They review test cases, track defects, and communicate testing status to developers and the Product Owner. They also make decisions about testing priorities, release readiness, and whether major issues need to be resolved before launch.

**4 . Define a list of at least 5 testing activities needed for a small project to add a 'Dark Mode' toggle in a music app like Spotify. For each activity, specify whether it should be done by the Tester or Test Leader.

Hint: Think about planning, designing, executing, and reviewing tests for this feature.**

Testing Activities for a Dark Mode Toggle

Project: Adding a “Dark Mode” Toggle in a Music App Like Spotify

No	Testing Activity	Description	Performed By
1	Test Planning	Decide the testing scope, required devices, test schedule, and expected results for the Dark Mode feature.	Test Leader

2	Test Case Design	Create test cases for enabling, disabling, and switching between Light Mode and Dark Mode.	Tester
3	Functional Test Execution	Check whether the Dark Mode toggle works correctly and changes the app theme as expected.	Tester
4	UI Testing	Verify that text, icons, buttons, album covers, and backgrounds are clearly visible in Dark Mode.	Tester
5	Compatibility Testing	Check whether Dark Mode works properly on different devices, screen sizes, and operating systems.	Tester
6	Regression Testing	Check whether enabling Dark Mode affects music playback, playlists, search, downloads, or other existing features.	Tester
7	Test Review and Reporting	Review test results, monitor defects, and decide whether the feature is ready for release.
